

Leveraging Intivix to move our company to Office 365 has helped us in several important ways. We use the document collaboration and secure sharing capabilities extensively, which have been among the biggest benefits of moving to Office 365. Office 365 has really sped-up the way we work and helped us to be more efficient. We're able to focus on our customers to a level that sets us apart from the competition.

We get a real sense that Intivix is committed to our success. They are friendly, responsive, and we know they are working with us to make sure our processes and systems are resilient and secure.

Intivix is committed and focused on providing excellent customer service, implementing security best practices, and counsels us with expert and unbiased IT advice. We have worked with other IT firms before choosing Intivix. Yet, when Intivix came onboard, we quickly realized what our previous IT providers never delivered on.
