

Intivix successfully designed, managed, and migrated us to the Office365 suite. One of the biggest benefits for us has been the universal availability of these tools – we use it anytime, from anywhere. Our team really loves having instant access to email, contact, calendars, and the other functions that Office365 provides. It has been a big productivity enhancer for us. Intivix migrated us with minimal interruption which was a huge help to our team.

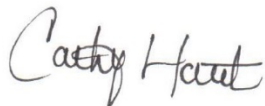

We have used other consulting companies in the past, but Intivix is heads and shoulders above those companies. We really appreciate the personal attention we receive from Intivix, the fast response, and the knowledgeable support that help us stay working with top efficiency.

If you choose Intivix, you won't be sorry. Their client-first focus, willingness to go the extra mile to solve any issues that arise, and extreme dependability is second to none. We know they have our back.

Intivix also keeps us abreast of the latest and greatest IT options available to us so we can stay ahead of our competition and solve real business problems.
